June 24th – Last Day of KRR Summer School

School
F E E S All Fees need to be paid and library books need to be returned or paid for by the last day of school, May 28th

2nd Grade with Ms. Wilson

It's hard to believe how quickly this year has gone. Second grade has been very busy. In math, we have been working on solving addition and subtraction problems using different strategies and using RDW strategies for problem solving. In reading, we have been working on reading with fluency, retelling stories, and using the RACE strategy to write answers.

I wish all our second graders a safe, fun summer! Parents please continue to have your child read to you throughout the summer and practice telling time and counting money. I encourage you to take advantage of the summer reading program at the Finney County Public Library.

The Resource Room with Miss Bendert

Wow what a year! As we prepare for the end of the school year it is always fun to reflect back on what hard work has been put in and see the growth that has been made. In my classroom we have worked hard on reading, math and writing using programs like RAVE-O, Reading Milestones, Blending for Non-Blenders, Susan Barton Reading and Spelling, Eureka Math Support Activities, and Zearn. Some students have also worked on social skills through programs like Zones of Regulations and Superflex. Dolphins let's end the year on a high note! It is great to be a Dolphin!

Thank you

Lauren Bendert

Remember This Summer to Be Safe in the Sun

Sun UV rays are most harmful during midday; try to plan indoor activities then or seek shade under a tree, umbrella, or a pop-up tent. Use these options to prevent sunburn, not to seek relief once it's happened.

Clothing that covers your child's skin helps protect against UV rays

Hats that shade the face, scalp, ears, and neck are easy to use and give great protection. Caps are popular among kids but they don't protect their ears and neck, be sure to protect exposed areas with sunscreen.

Sunglasses - Look for sunglasses that wrap around and block as close to 100% of both UVA and UVB rays as possible

Use Sun Protection Factor (SPF) of 15 or higher with both UVA *and* UVB protection

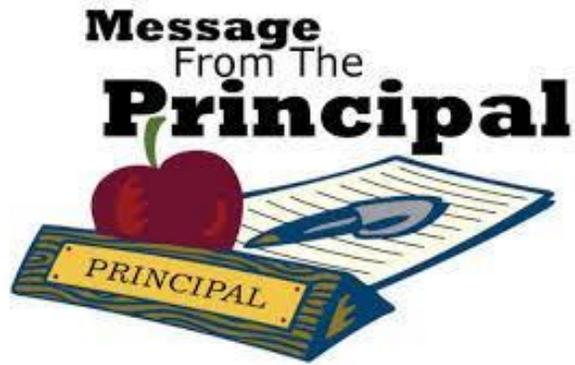

For most effective protection, apply sunscreen generously 30 minutes before going outdoors.

Take sunscreen with you to reapply during the day. This applies to "waterproof" and "water resistant" products also.

Remember Sunscreen reduces damage from UV radiation, it doesn't eliminate it.

Have A Great Summer from Your School Nurse

A Note from the Principal

As I write this note, there is snow on the ground and we have freezing temperatures. The ups and downs of spring weather can be easily compared to the ups and downs of the last few weeks of school! Everyone is excited about the upcoming summer break and fun end of the year activities and many struggle to keep their focus on the important task of learning. We know this is normal for this time of year and ask for your support as we strive to maximize the instructional time we have left. Students have completed state assessments, but we still have district screeners to administer in the coming weeks. We are excited to see the growth our students have made! We are also continuing to provide interventions to help close the learning gaps caused by interruptions in learning due to Covid. Thank you for your support this challenging school year! We recognize that our successes as a school are influenced greatly by the partnership we have with our families. Many thanks for being our partners in education and as always, don't hesitate to contact us if you have any questions or concerns!

Sincerely,

Amy Hollingsworth

Have a GREAT Summer! Stay Safe and Remember to READ!
